NEW DEVELOPMENT

Seventeen different variations of exhaust rose nuts in a choice of materials and finishes, Brass, Dull plated brass, Bright plated brass, Stainless steel and Aluminium alloy anodised black. Also a special spanner that allows the exhaust roses to be fully tightened without the need to cast unsightly lumps between the fins. Please note there are three different shaped Spanner heads, one for single cylinder exhaust roses, one for twins with round fin style and one for the 850 style fin.

NEW DEVELOPMENT

We have designed and produced a kit with the aim of positively locking and locating loose rocker spindles. Previously the only reliable method of affecting a permanent remedy was the tedious and expensive task of machining the cylinder head and bushing the spindle location bores. The remedy we have developed is a simple and reliable fit and forget solution. It replaces the two plate two gasket system with a 6MM thick stainless outer plates, drilled and tapped to accept a grub screw with a stainless steel slotted nut to lock the grub screw in place and affect a seal.

FIERCELY MADE IN
MEADVILLE, PA

**125 YEARS OLD, AND IT
STILL HAS ALL ITS TEETH.**

125 YRS
ESTABLISHED IN 1898

The 430[®] Tongue and Groove Plier. Behold, it's a shiny 18 ounces of American high-carbon C400 steel. At a healthy 18 inches long, it's got the leverage you need to really get in and on a stubborn nut. And its right-angle, laser-forged, heat-treated teeth hold a nut in either direction. Is it more plier than you need? Probably. It took 125 years to make a plier this versatile.

EVERY ROAD HAS A RHYTHM. FIND IT.

To sportbike riders, there's nothing quite as irresistible as an empty, winding road. The best roads possess a rhythm all their own. And the best way to unlock it is on the most advanced sportbike tire Dunlop has ever offered: The Sportmax Q2. The rear Q2 features Dunlop's Innovative Response Profile™ (IRP), an innovative tire shape that puts down a big footprint at high lean angles for enhanced handling and grip. IRP gives you greater freedom in line choice through corners, and remarkably linear steering. Dunlop's MF Multi-Block™ technology provides a long wearing center compound with special lateral grip compounds on each shoulder for impressive cornering traction. Get in tune with that special piece of road aboard the Sportmax Q2—only from Dunlop.

SPORTMAX Q2 IRP MF

For more Dunlop tire information go to dunlopmotorcycle.com or call 800-858-3333. ©2011 Dunlop. Performance is a shared pursuit by professionals. Only at tracks and safety first. Dunlop does not endorse or encourage speeding, illegal, or unsafe acts.

TRI-SPARK CLASSIC TWIN DIGITAL ELECTRONIC IGNITION

SUITABLE FOR: TRIUMPH · NORTON · ROYAL ENFIELD · BSA

- Fully Digital
- Extreme spark stability
- Coil saturation control
- LED static timing indicator
- Automatic coil shut off
- No Weights - electronic advance
- No black box - complete unit under the cap
- Idle stabilisation
- Race proven
- Easy starting without kickback
- Extreme temperature safe
- Eliminates points, condensers and auto advance unit
- Made in Australia

The Tri-Spark 'Classic Twin' digital electronic ignition is a proven drop-in system for British twins. There's no guess work and no tuning required.

It doesn't look like an aftermarket accessory because everything fits neatly under the cap. This unit is compatible with a wide range of ignition coils including our Tri-Spark Power coils designed to look and fit like the original Lucas coils. It also features automatic dwell control for minimum battery drain and maximum spark without unnecessary heating in the coils.

Suitable for use with 2 of our 6 volt coils or one dual output coil (must be long dwell type). Electronic advance for reliable jitter free spark timing (with extra spark retard for easy kick starting and idle stabilisation).

Tri-Spark: The world's leading ignition for classic motorcycles.

The comfort of the curves.

Meteors® earplugs now come in a new, small size to fit smaller ear canals. The same exceptional comfort that comes from the unique curved design of Meteors is now available for women and other workers with smaller ear canals. The contours follow the shape of the ear canal which means less pressure at the smallest diameter of the earplug. Meteors innovative undercut design affords a secure fit all day long. The large base helps provide proper insertion, fit and removal. Like all Moldex products, Meteors are 100% PVC-FREE.

Meteors, Small have an NRR 28dB and Meteors have an NRR of 33dB – both are independently tested. The bright green color is a trademark of Moldex-Metric, Inc. and also provides easy compliance checks. Plug your workers into the latest in comfort at www.moldex.com.

Kendon Stand-Up TRAILERS & LIFTS

Kendon Cruiser Lift

The Cruiser Bike Lift is perfect for domestic and import motorcycles. With a 1,000 pound capacity the Cruiser Bike Lift can accommodate most bikes on the road. This motorcycle lift can fit a bike up to 90" long (measured from the front of the front tire to the center of the rear axle).

- The lift can fold up for less space and easier storage
- Operation: Manual or Hydraulic
- Standing Height: 70 inches
- Depth: 17 inches
- Width: 28 inches
- Weight: 140 lbs.
- Lift Capacity: 1,000 lbs
- New & improved air-over-hydraulic jack with extruded aluminum housing for improved valving and slow, controlled descent
- Front wheel chock now adjustable for different sized front wheels
- New optional wide tire loop for tires bigger than 130mm
- Laser-cut 5-position height brackets
- Improved quick-release front positive-stop front wheel loop
- Specially molded new front foot stops for greater stability when loading
- Refined top rail for increased rigidity
- Additional oil drain holes
- New front rail gussets
- The frame jack will enable the owner to elevate the motorcycle up from the lift to change tires
- The price is FOB Anaheim, CA

Price
\$650.00

Motorcycle

Yuasa's Motorcycle Resource Area

At Yuasa, we have been manufacturing batteries for motorcycles built in the US, starting with Honda, since 1979. Throughout the years, Yuasa has supplied more batteries for manufacturers, such as Buell, Cannondale, Excelsior-Henderson, Harley-Davidson, Honda, Indian, Kawasaki and Polaris Victory, than all other battery manufacturers combined. We have always strived to exceed the needs of our manufacturers with technology that meets the demanding requirements of their motorcycles. Manufacturers demand the best and they overwhelmingly choose Yuasa. So should you.

The New Arai Signet-Q: THE AMERICAN HELMET.

"The Signet-Q is, without a doubt, the most comfortable helmet I have ever worn ... it transports the fit of an Arai into a different dimension for me and others like me, by allowing us to find the ideal size that takes our [long oval] head shape into account." (ULTIMATE MOTORCYCLING, Winter, 2012)

"Arai isn't telling anyone that the new Signet-Q is a revolution in helmet design. But what the company has done with its newest model is significant, particularly for the American market." (ROADRACING WORLD, January, 2012)

Designed and built exclusively for American riders, the new Signet-Q delivers a noticeably better fit for the longer front-to-back head shapes most common here. (The kind that get those painful forehead 'hot spots' in rounder-shaped helmets.)

"The fit of the new Signet-Q is amazing. I didn't even know I needed this helmet until I put it on and rode about 120 miles ... the comfort factor got kicked up a notch or three ... "With no pressure points anywhere, the helmet felt lighter, as if weight was more evenly distributed around my skull ... finished in the typically flawless Arai manner." (ROADRACING WORLD, March, 2012)

"Fit is superb, venting is excellent and wind noise is minimal (thanks in part to a better fitting helmet)." (RIDER, January, 2012)

Different Arai models are created to fit differently. It's the extra lengths — and widths — we go to.

"Trying on the Arai RX-Q and Signet-Q back-to-back did reveal a surprising difference in fit." (Ultimate Motorcycling)

Why does Arai make such a big deal about comfort and fit, do we think we're special?
No, we think you are.

"For three generations, our family business has answered only to riders, not to profit-hungry Directors." Our helmets are expensive because they cost so much to build, not to make someone's shareholders rich. That is the Arai difference." (Michio "Mitch" Arai)

It's not just a helmet, it's an Arai.

Arai HELMET

#1 in Customer Satisfaction 13 years in a row.

30" Pedestal Fan

This pedestal fan is great for use in repair shops and showrooms due to its limited amount of floor space it uses, as well as how much air it actually moves. A 30" fan that moves 9535 CFM of air, and only pulls 1.9 amps I literally unheard of!

Specifications:
Motor: 1/5 HP
Speeds: 2
Amp Draw: 1.91 amps on its highest setting
Fan Speed: 1100 RPM
Air Flow: 9535 CFM
Power Cord: 10 ft.
Weight: 60 lbs.

30" Pivoting Drum Fan

With this 30" pivoting drum fan, you can direct the flow of air in nearly any direction. The steel tubed cart is mounted on wheels to make movement around the shop as easy as possible. With 3 different speeds, this fan moves up to 7400 CFM on its highest setting.

Specifications:
Motor: 1/4 HP
Speeds: 3
Amp Draw: 2.0 / 1.8 / 1.6 amps
Fan Speed: 1100 / 975 / 822 RPM
Air Flow: 7400 / 6360 / 4980 CFM
Power Cord: 10 ft.
Weight: 48 lbs.
